*American Heart Association recognizes West Jefferson's commitment to quality stroke care*

(MARRERO, LA - MAY 2017) — [West Jefferson Medical Center](#) (WJMC) has received the American Heart Association/American Stroke Association's Get With The Guidelines®-Stroke Gold Plus Achievement Award with Target: Stroke<sup>SM</sup> Honor Roll Elite Plus. The award recognizes the hospital's commitment to providing the most appropriate stroke treatment according to nationally recognized, research-based guidelines based on the latest scientific evidence.

Hospitals must achieve 85 percent or higher adherence to all Get With The Guidelines-Stroke achievement indicators for two or more consecutive 12-month periods and achieve 75 percent or higher compliance with five of eight Get With The Guidelines-Stroke Quality measures to receive the Gold Plus Quality Achievement Award.

To qualify for the Target: Stroke Honor Roll Elite Plus, hospitals must meet quality measures developed to reduce the time between the patient's arrival at the hospital and treatment with the clot-buster tissue plasminogen activator, or [tPA](#), the only drug approved by the U.S. Food and Drug Administration to treat [ischemic stroke](#). If given intravenously in the first three hours after the start of stroke symptoms, tPA has been shown to significantly reduce the effects of stroke and lessen the chance of permanent disability. West Jefferson earned the award by meeting specific quality achievement measures for the diagnosis and treatment of stroke patients at a set level for a designated period.

These quality measures are designed to help hospital teams follow the most up-to-date, evidence-based guidelines with the goal of speeding recovery and reducing death and disability for stroke patients.

“Time is everything for a stroke patient. Acting quickly can save critical brain function. This recognition further demonstrates our commitment to delivering advanced stroke treatments to patients quickly and safely,” said Nancy R Cassagne, President and CEO of West Jefferson Medical Center. “West Jefferson continues to strive for excellence in the acute treatment of stroke patients. The recognition from the American Heart Association/American Stroke Association’s Get With The Guidelines-Stroke further reinforces our team’s hard work.”

West Jefferson Medical Center’s Stroke Center earned The Joint Commission’s designation as Louisiana’s *first* Nationally Certified Primary Stroke Center in 2006. The designation features a comprehensive system for rapid diagnosis and treatment of stroke patients admitted to the emergency department.

“The American Heart Association and American Stroke Association recognize West Jefferson for its commitment to stroke care,” said Paul Heidenreich, M.D., M.S., national chairman of the Get With The Guidelines Steering Committee and Professor of Medicine at Stanford University. “Research has shown there are benefits to patients who are treated at hospitals that have adopted the Get With The Guidelines program.”

According to the American Heart Association/American Stroke Association, stroke is the No. 5 cause of death and a leading cause of adult disability in the United States. On average, someone in the U.S. suffers a stroke every 40 seconds, someone dies of a stroke every four minutes, and nearly 800,000 people suffer a new or recurrent stroke each year.
